9-18-9 ROW CROP LIQUID

Liquid Concentrated Fertilizer for Foliar, Soil Applied and Transplanting

AVOID FREEZING

KEEP OUT OF REACH OF CHILDREN

CAUTION

WHAT TO DO IN CASE OF CONTACT:

IF INGESTED: Induce vomiting. Immediately call physician.

EYE CONTACT: Flush eyes with clean water for 15 minutes. Seek medical attention immediately.

SKIN CONTACT: Remove contaminated clothing and wash skin with soap and water. Seek medical attention if inflammation develops or persists.

IF INHALED: Move to fresh air and seek medical attention if inflammation develops or persists.

Net Contents: 2.5 gallons
250/265/275 gallons

SUGGESTED DIRECTIONS

General use: Apply at 2 to 4 quarts per acre as a foliar application to supplement the normal soil applied fertility program. Aircraft application may be made at the rate of 2-4 quarts in 5 gallons of water per acre. The rate for backpack sprayers is 2 ounces per gallon of water. Broadcast rate of Plant Agra is 2 to 4 quarts per acre on a 5 to 7 day schedule for most crops.

Compatibility: Plant Agra 9-18-9 is compatible with most pesticides commonly used on vegetable, fruit and agronomic crops.

CAUTION: Do not use with dormant oil, Lime Sulfur, Spray Lime, or highly alkaline spray materials. Add Plant-Agra 9-18-9 to the spray tank or premix tank when it is about 1/2 full. Agitation in the tank is preferred to increase the mixing of all pesticides.

Transplanting: Use 1 gal of Plant Agra 9-18-9 per 100 gallons of water in the water wheel transplanter or other machinery used for the same purpose.

Vegetable crops: Tomatoes, peppers, cucumbers, melons, squash, beans, potatoes etc. Use at the rate of 1 gallon Plant Agra 9-18-9 per acre in spray tank or 2 quarts per 100 gallons of water by volume.

Fruit crops: apples, peaches, plums, nectarines, cherries, citrus, etc., Use at the rate of 1 gallon Plant Agra 9-18-9 per acre in spray tank or 2 quarts per 100 gallons water by volume.

Row crops: cotton, soybeans, peanuts, field corn, popcorn, wheat, rice, etc. Use at the rate of 1 gallon per acre on a 10 to 14 day schedule to improve growth and yield. 1 to 5 applications is desirable depending on the crop and season.

Turf, ornamentals, hay and forage crops: Apply at the rate of 1 to 2 gallons per acre for extra growth as a foliar spray on a 7 to 10 day schedule.

Berries: blueberries, blackberries, raspberries, cranberries, grapes, etc. Use at the rate of 1 gallon per acre early in the season or whenever it is necessary to improve vine or cane vigor and growth.

Strawberries: Use at the rate of 1 gallon per acre when the first fruit buds show in the crown. Three or more additional applications are desirable at 7 to 10 day intervals.

Application: By ground application- 1 gallon per acre in 10 to 30 gallons of water. By air - 2 to 4 quarts per acre in 3 to 5 gallons of water per acre.

Hydroponic cultures: 16 ounces of Plant Agra 9-18-9 per each 100 gallons of water yields a nutrient solution containing 30 ppm of each of the major nutrients. For specific crop recommendations, consult your State Horticultural Experiment Station.

Information regarding the contents and levels of metals in this product are available on the internet at <http://www.aapfco.org/metals.htm>. Use this product in accordance with good agronomic practices, which include utilizing proven spray equipment set for proper coverage. Do not make applications when temperatures are too hot. Applications should be made at temperature levels and when other environmental conditions in your area are such that your experience indicates the application will be compatible and will accomplish the desired result.

The use of this material being beyond our control and involving elements of risk, to human beings, animals and vegetation, we do not make any warranty, express or implied, as to the effects of such use, when this product is not used in accordance with the directions as stated on this label.
