

INGREDIENTS: (Percent by Weight)

Ammonium sulfate* solution, Defoamer
dimethylpolysiloxane and Polymeric
viscosity modifier 100%
Ammonium sulfate active ingredient 3.4 pounds per gallon.

AMS + DRIFT + pH ADJUSTER

GENERAL INFORMATION:

ADA contains a special high molecular weight polymer which is active at very low concentrations, providing improved spray deposition while minimizing off-target drift. Ammonium sulfate and special ion-blocking agents condition the spray mix by complexing antagonistic metal cations which may interfere with herbicide activity. This water conditioning feature is very important with many postemergent herbicides such as glyphosate.

ADA also contains anti-evaporants designed to increase the amount of spray reaching the target, and allow for maximum absorption and penetration into the leaf surface. An integrated anti-foaming agent minimizes excess spray tank foam.

The general use rate is 2.5 to 5 gallons per 100 gallons of water. 2.5 gallons of ADA delivers approximately 8.5 lbs. of ammonium sulfate. AIR-32 to 64 ox per 100 gallons AQUATIC 8 to 32 oz per 100 gallons.

Directions for mixing: Always mix this product in accordance with the instructions concerning adjuvants found on pesticide label. In the absence of specific mixing instructions, fill the spray tank to 1/3 to 2/3 full with clean water. While the water is agitating, add tank mix ingredients in the following order:

1. ADA
2. Water-soluble packets
3. Dry flowables and dispersible granules
4. Flowables
5. Water-soluble pesticides
6. Emulsifiable concentrate. Continue agitation and finish filling spray tank with water.
7. Add additional adjuvants

Maintain agitation while spraying to ensure a uniform spray mixture.

Directions for use:

1. Shake well or recirculate before using if product has been stored below 32°F.
2. Carefully follow Directions For Mixing.
3. Always use this product in accordance with the instructions concerning additives found on the pesticide label.
4. Contains antifoam/defoamer and deposition polymers to mitigate drift.
5. Under extremely hard water conditions, additional ammonium sulfate solution may also be required.

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal condition of use, but neither this warranty or any other warranty of merchantability of fitness of a particular product expressed or implied, extends to the use of this product contrary to label instructions or under abnormal conditions, or under conditions not reasonably foreseeable to the seller, and buyer assumes the risk of any such use.

PRECAUTIONS: Liquid causes eye injury. In case of contact with eyes, flush with water for 15 minutes. Contact physician if irritation persists.

Dispose of container in accordance with local, state and federal regulations.
