## ANTI FOAM

### A DEFOAMING AGENT

**PLANT AGRA ANTI-FOAM** is designed to reduce foam in agricultural chemical sprayers and also in dip tanks, such as those used in the grading of Peaches and Apples.

**APPLICATION RATE:** Use 1/2 - 2 oz. Anti-Foam to 100 gallons to reduce foam in tank. Foam develops in spray tanks when highly emulsified agricultural chemicals and surfactants are placed in the spray tank during the filling and agitation operation. When the spray tank is more than half full, many times a large amount of foam will almost fill the balance of the tank. In order to complete the filling operation of the tank, the foam must be removed. This is the time to use Plant Agra Anti-Foam.

Use this product in accordance with good agronomic practices, which include utilizing proven spray equipment set for proper coverage. Do not make applications when temperatures are too hot. Applications should be made at temperature levels and when other environmental conditions in your area are such that your experience indicates the application will be compatible and will accomplish the desired result.

The use of this material being beyond our control and involving elements of risk to human beings, animals, and vegetation, we do not make any warranty, express or implied, as to the effects as stated on this label. **AVOID FREEZING**

**KEEP OUT OF REACH OF CHILDREN  
CAUTION**
